

What if you ...

could place different 3D CAD files with the finest details on any GIS map?

SEPARATE 3D CAD FILES

CHOICE OF GIS MAP

ONE UNIVERSAL GIM MODEL

GIMmaps brings the worlds of CAD and GIS together

What does it do?

GIMmaps creates one large model in which all assets from your organization and those of your partners are available in any geographically sized area at any desired level of detail, without the need of manual redrawing.

Advantages

- ➔ uniform overview
- ➔ time savings
- ➔ more detail
- ➔ insight
- ➔ efficiency
- ➔ cost savings
- ➔ teamwork

For whom?

Asset management of:

- municipalities
- water authorities
- network operators
- building managers
- and more...

How?

Contact us for a no-obligation exploration and discover how GIMmaps brings more overview and insight and significant savings.
