Do you know ...

what your customers need?
This varies greatly in terms of CAD format and level of detail required. It becomes even more complex when you deliver to multiple industries?

What if ...

delivery is no longer an issue and your offering always perfectly aligns?

With **GIMStore** on your website you increase your chances of collaborations

What does it do?

GIMstore solves the problem between suppliers and clients when it comes to providing CAD files for construction and specification drawings. You upload what you have, your client downloads what they need. GIMstore takes care of the rest: it always fits. This way, you can maximize the service you provide to your client.

Advantages

accurate

the correct format

interchangeable

detailed customization

version control

customized for customers

→ IP resistant

How?

For whom?

For marketers and product designers of manufacturers and suppliers in the manufacturing industry.

Contact info@gimtransfer.com to make an appointment for an exploratory conversation and discover how GIMstore can optimize your connection to your customers.
